

## Please Insert the Title of Your Talk Here

A. Maths<sup>1</sup>, B. Sciences<sup>2</sup>, C. Lemma<sup>3</sup>, D. Technology<sup>4</sup>

<sup>1</sup> University of Copenhagen, Denmark, {maths,social-sciences}@ku.dk

<sup>2</sup> Wilfrid Laurier University, Waterloo, Canada, natural-sciences@wlu.ca

<sup>3</sup> CSIRO, Canberra, Australia, lemma@csiro.au

<sup>4</sup> Massachusetts Institute of Technology, Cambridge, USA, technology@mit.edu

Use this format (without changing the settings) to prepare your abstract. The abstracts are used for evaluation purposes. Therefore, it is important that you describe your intended presentation concisely and clearly, including the objectives, status, methodology, results, and significance of your study. Abstracts may contain equations, figures and references (see Eqs. (1, 2) and Refs. [1, 2, 3]). **The extended abstract length is limited to 5 pages.** Equations are to be centered horizontally, with equation numbers aligned with the right margin. Paragraph text is full-justified. Do not explicitly begin by writing the word “abstract”. Equations should be properly punctuated. For instance, as

$$y = 3x^2 \quad \text{and} \quad x > 0, \quad (1)$$

we see that

$$z = \sqrt{y} = \sqrt{3}x. \quad (2)$$

Your abstract should be prepared in  $\text{\LaTeX}$  according to the template provided and then **converted to PDF for submission**. Abstracts not complying with this template may not be included in the book of abstracts of the ACA 2015. Abstract submission should be done via the session organizers, they will confirm your submission. If your abstract is accepted, you will be invited to present your talk. The book of abstracts will be available to the participants prior to the conference and will provide the audience with more information about the papers being presented at the ACA 2015 Workshop. At least one author must be registered for your talk to be included in the program of the conference.
